

COBOTIC for all companies

Thanks to new technologies, industrial robots are leaving their "cages" and interact with humans in a shared workspace. Cobots open up new possibilities and enhance the **productivity**, the **flexibility** and the **ergonomics**. Less restrictive and easier to use, cobots enable companies to automate tasks as a way to improve response times and therefore their **competitiveness**.

COBOTIC FOR VSBs, SMBs and VBBs

- ▶ **Ergonomically** designed workplace for operators
- ▶ **Great accuracy** and **repetitive** manufacturing operations
- ▶ **Mobility** and **flexibility**
- ▶ **Quick return of investment** thanks to multi-purpose concept

THE HUMAN-COBOT COLLABORATION'S ASSETS

- ▶ Reduction of **musculoskeletal disorder**
- ▶ Back to **high-added-value activities**

New

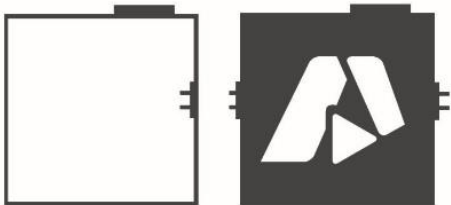

[CoboConcept][®]

A 4.0 cobotic module-based concept

- ▶ **Quick implementation** and **reduced workspace**
- ▶ **Flexibility** for small-batch sizes
- ▶ **Mobility** for multitasking
- ▶ High **quality** and **repeatability**
- ▶ Employees' **safety**
- ▶ Intuitive **HMI**

Plug and play

Existing or tailored process

CoboConcept[®] is composed of mobile and modular boxes

You choose your applications

Definition of the cobot that will be integrated on the box

The operator stays at the heart of the system

Responsability
